Objective

A driven CSE (AI & ML) undergraduate with a strong interest in cybersecurity, intelligent systems, and algorithmic problem-solving, seeking opportunities to apply technical knowledge in real-world scenarios. Passionate about developing secure, efficient, and innovation-driven software solutions while continuously strengthening skills in AI-ML, data structures, and system design.

Education

B.Tech (CSE(AI ML))

Projects

Intrusion Detection System

- Designed a security-oriented system to identify and analyze malicious activities within a network environment.
- Focused on threat detection, system monitoring, and preventive security measures.
- Enhanced understanding of cybersecurity principles and attack detection techniques.

https://github.com/samanayesha05-alt/IDS_SYSTEM

Gamified Learning Platform

- Developed an interactive learning platform integrating gamification techniques to improve user engagement.
- Implemented features such as progress tracking, rewards, and interactive learning modules.
- Addressed limitations of traditional learning systems through user-centric design.

BFS Algorithm Implementation

- Implemented Breadth-First Search (BFS) to explore graph traversal and shortest-path concepts.
- Strengthened algorithmic thinking and problem-solving abilities

<https://github.com/samanayesha05-alt/bfs-algorithm>

Certification

- DSA Training -TrainX (2025)
- Python Bootcamp -LetsUpgrade (2025)
- Stock Market Mastery-Bizgurukul(2025)
- Content Writing -Bizgurukul(2025)

Workshops

- Hands-on Workshop on AI & Machine Learning Applications
- Technical Workshop on Cybersecurity & Ethical Hacking Basics
- Workshop on Problem Solving using Data Structures & Algorithms

Skills

- Frontend: HTML, CSS, JavaScript, React
- Backend: Node.js, Express.js
- Tools/Platforms: Git, GitHub, n8n,VS Code,Antigravity
- Soft Skills: Teamwork, Time Management, Problem Solving, Leadership,Effective Communication
